

# HEATED ASPHALT HAULERS

Concord's trailer mounted, heated asphalt haulers offer a wide track, low profile design, ideal for safe operation in a variety of repair environments. The heavy-duty steel construction combined with your choice of diesel or propane fired heating systems ensure consistent and uniform service for years to come.

## DUMPING HAULER

Our dumping hauler design lets gravity do the work for you. Available in all models, the dumping option features an electronically actuated, hydraulic underbody hoist, dramatically reducing worker fatigue and improving efficiency of your road crew.

## AUXILLIARY TANKS

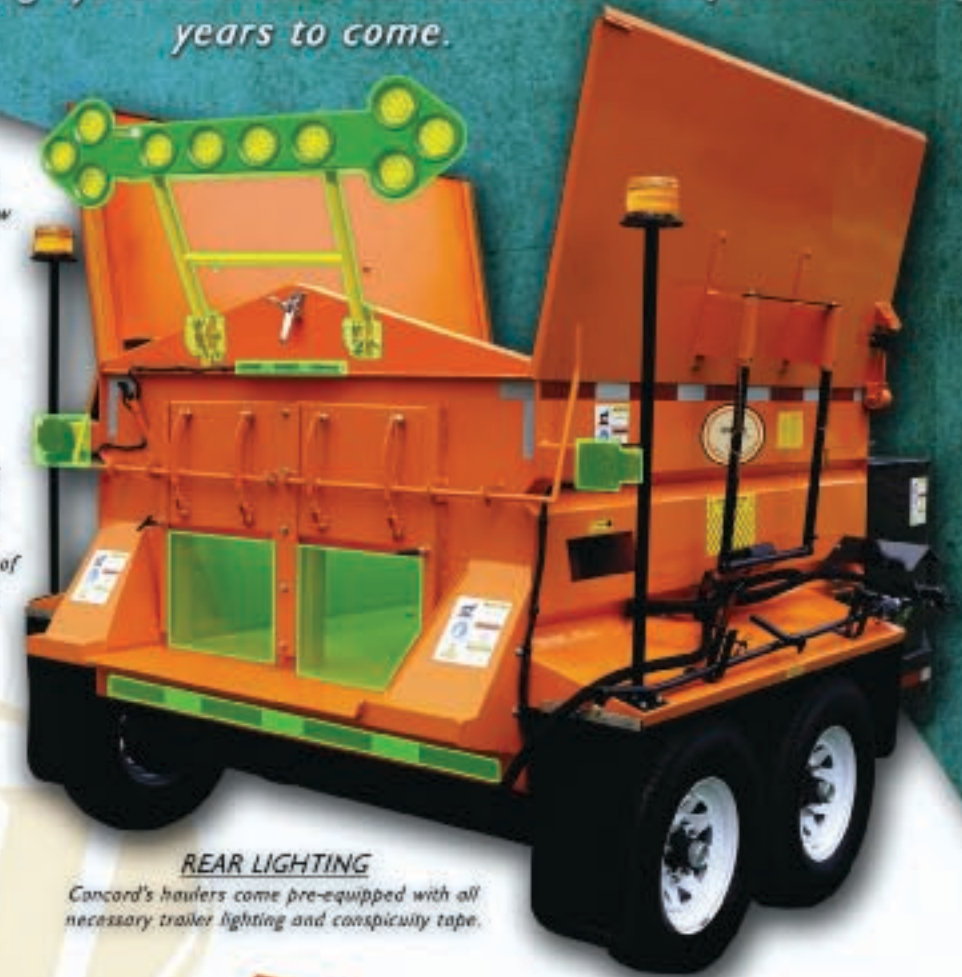

Optional diesel, hydraulic, and washout tanks available.

## ONBOARD CRANE

Optional adjustable crane mounted to the trailer frame for asphalt roller storage or combine with a platform for a vibratory compactor.

## ARROW BOARDS

Optional collapsible arrow boards are available.

## MATERIAL UNLOADING

Full insulated, independent & lockable guillotine doors for unloading just the right amount of material. Standard equipment on every model hauler.

## POWER SPRAY SYSTEMS

Our heavy-duty hydraulic systems feature an adjustable flow control, reversing valve for easy system clean out, heavy-duty asphalt pump, hand wand, hydraulic oil reservoir, and washout tank.

## TRAILER BRAKES

Electrically operated trailer brakes on all wheels with self-powered safety breakaway. Optional hydraulic surge braking system also available.

## TRAILER FRAMES

Every asphalt hauler manufactured by Concord is an NATM Certified trailer. Featuring a heavy-duty, structural steel channel frame, each hauler comes standard with an adjustable trailer lunette eye and safety break-away chains for easy loading and safe transport.

## TRAILER JACKS

Electric trailer jacks are standard on every hauler.

## REAR LIGHTING

Concord's haulers come pre-equipped with all necessary trailer lighting and conspicuity tape.

## TOP LOADING DOORS

All models feature easy-load, spring-assisted, fully insulated top loading doors with retractable handles and safety latches.

## HAND TORCHES

Optional propane-fired hand torches are available as well as trailer-mounted propane tank mounts.

## STROBE LIGHTING

Optional streetside & curbside pole mounted strobe lighting available on all Concord dumping & non-dumping haulers.

## FUEL TANKS

Heating systems available as liquid or vapor withdrawl propane or diesel/kerasene fuel fired.

## MATERIAL TANKS

Fully insulated tanks are available in several standard sizes, starting at 40 gallons. Custom sizes and material loads are also available.

## HAULER TRANSPORT

Adjustable trailer lunette eye with safety breakaway chains. Standard equipment on every model hauler.

## HEATER CONTROLS

All heating systems are auto ignite, thermostatic, and digitally controlled with all operator components installed within a NEMA certified enclosure. All models feature easy to read digital displays and independent heater controls, which display the actual temperature and set point temp simultaneously.

## REAR AXLES

7000lb capacity axles with rubber torsional spring suspension standard on every hauler. The CRE-250AH-TR 2.5 ton capacity model is a single axle trailer while the CRE-400AH-TR 4.0 ton capacity model is a tandem axle.
