

Asphalt Maintenance Trailer

ABOUT THE PRODUCT

Concord's trailer-mounted, heated asphalt haulers offer a wide-track, low-profile design, ideal for safe operation in a variety of repair environments. The heavy-duty steel construction combined with the diesel fired heating system ensures consistent and uniform service for years to come.

KEY FEATURES

- Fully powder coated 5/16 thick grade 50 steel trailer frame with rubber torsional axles and electric brakes provide smooth towing and low maintenance.
- Hydraulic opening top doors allow for safe loading. Optional wireless remote allows top door operation without leaving the tow vehicle.
- Twin sliding rear doors with heated shelf for easy shovel unloading and integrated hoist with rear mounted control allows for larger quantity distribution. Two heated shovel storage boxes at rear for convenient access & operation, along with additional storage attachment options on trailer tongue.
- Integrated amber warning lights around full perimeter of trailer for increased visibility and safety. Optional traffic advisor arrow and work lights available to fit your requirements.
- Diesel fired heating system with stainless steel combustion chamber and exhaust stack combine with a fully insulated hopper to keep asphalt workable all day.
