

CONCORD

Road Equipment Mfg., Inc.

The Titan Sno-Pusher by Concord Road Equipment is built strong to perform in the harshest of conditions. Titan Sno-Pushers are manufactured with not only multiple full length horizontal structural channel reinforcements that pierce through the high tensile steel moldboard end plates, but are also additionally reinforced with multiple interlocking vertical ribs for maximum strength and durability. Even the structural angle cutting edge mount has additional reinforcement with diamond shape gussetting. The heavy duty end plates have bolt in tubular braces. Options include bucket saddle attachment, or a quick coupler to match your machine; rubber, steel, or carbide cutting edges; and multiple skid shoe material choices.

Providing Innovative Manufacturing Solutions for the Municipal, Construction, and Industrial Markets since 1976.

Titan Sno-Pusher

Titan Sno-Pushers are available in standard lengths from 8 to 30 feet and are designed to fit any machine including skidsteers,

small to large loaders, and 4x4 backhoes. Titan Sno-Pushers are available in three standard heights: 36", 48", and 60"; Custom sizes are also available.
