### Titan Snow Plow Hitches

Titan snow plow hitches by Concord Road Equipment are built strong to perform in the harshest of conditions. These heavy duty low profile snow plow hitches are available with a center lift or offset lift arrangement to provide clearance for a front engine driven hydraulic pump while keeping the hitch extremely close to the chassis hood. All Titan snow plow hitches feature a heavy duty construction lift cap that folds down for storage and a tubular telescopic lift arm to adjust to fit any make and model snow plow. The TTN-400 model line is well suited for class 7 and 8 chassis, with chassis specific side plate style mounting kits available for most makes including Freightliner, Mack,

International, Peterbilt, Sterling, Western Star, and more; and universal bumper to frame push arm style mounting kits. The TTN-450 model line is available for most class 4, 5, and 6 chassis including Ford, Freightliner, International, and more. With many standard coupler choices, including pin ears, drop pin and loop, arrowhead, and twin pocket, and even wing plow systems, the Titan snow plow hitches fit all your fleet needs.

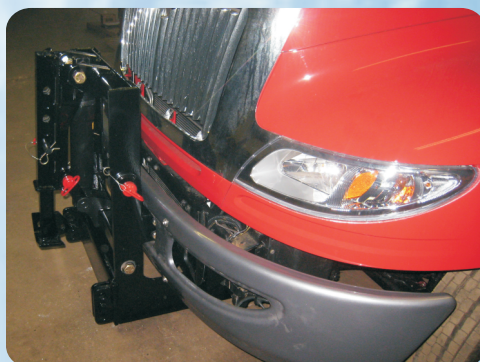

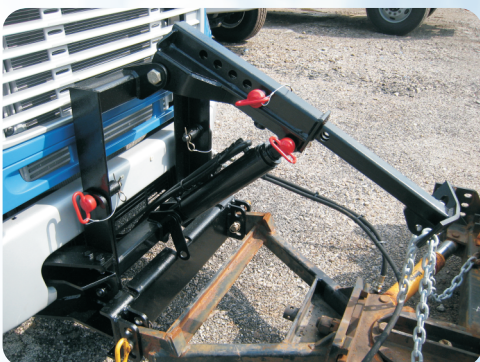

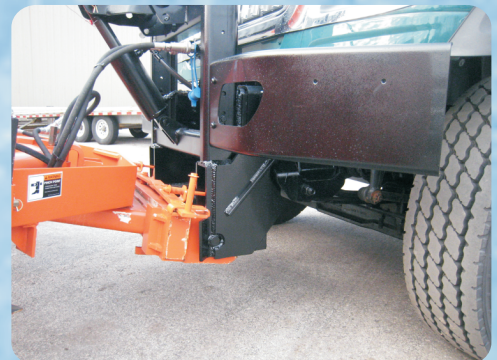

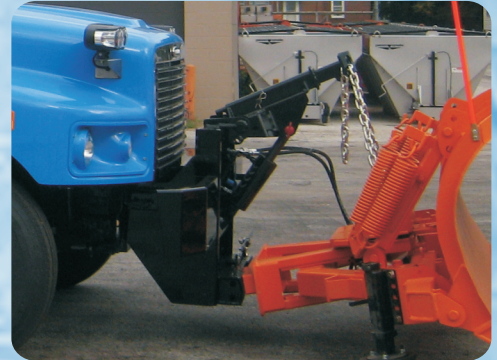

Providing Innovative Manufacturing Solutions for the Municipal, Construction, and Industrial Markets since 1976.
